

Victimized

Our lives are fake

They mean nothing, you see

Our dreams are lost

Just a fantasy

How many times have you been misguided?

How many times have your hopes been smited?

This life means nothing to me

Victimized, deceived

A black veil of insanity's crushing

Like fire beating all of our disease

The black veil of insanity misleads

Our hearts are free

Does that mean anything?

Do what we're told

Self-seeking hypocrisy

How many times have you been misguided?

How many times have your hopes been smited?

This life means fuck to me

Victimized, deceived

A black veil of insanity's crushing

Like fire beating all of our disease

The black veil of insanity misleads

Black veil, it's coming for me

It's coming for me, it's coming for me

It's coming for me, it's the black veil

Of insanity, it's coming for me

Set free, set free, set free, set free

Set free, set free, set free, set free

Set free

Victimized, deceived

A black veil of insanity's crushing

Like fire beating all of our disease

The black veil of insanity misleads
