

Baby

Baby, baby, baby, baby, baby
Take a look around, no one can make me
Deep inside this space is where I hate me
Stuck around, I'm so alive, just save me
Hands on your head and your chest feeling tight
You wanna look around and shake me
You wanna fuck around and let me go this time
What's even worse, you tried to break me
You go and look around and see what you can
find
See what you can find, you can find

Baby, baby, baby, baby, baby
I know what you came here for - to tempt me
Quiet down the thoughts that brace to kick me
Either way, I know that you'll resent me
Hands on your head and your chest feeling tight
You wanna look around and shake me
You wanna fuck around and let me go this time
What's even worse, you tried to break me
You go and look around and see what you can
find
See what you can find, see what you can find

Taking my time, taking my chances
Take me away, sick of these dances
Taking my time, taking my chances
Take me away, sick of these dances
Taking my time, taking my chances

Take me away, sick of these dances
Taking my time, taking my chances
Take me away, sick of these dances

You wanna look around and shake me
You wanna fuck around and let me go this time
What's even worse, you tried to break me
You go and look around and see what you can
find

You wanna look around and shake me
You wanna fuck around and let me go this time
What's even worse, you tried to break me
You go and look around and see what you can
find

I wanna save you, I wanna blame you
I wanna save you, I wanna blame you
I wanna save you, I wanna blame you
I wanna save you, I wanna blame you
